Rewari, Haryana | +91 9350452428 | kramsewak12345@gmail.com | linkedin.com/in/ram-sewak-sharma-308241256 | github.com/shubham93-ops

PROFESSIONAL SUMMARY

Cybersecurity professional with hands-on experience in network security, vulnerability assessment (VAPT), and system hardening across Linux and Windows environments. Skilled in configuring, monitoring, and troubleshooting security technologies (Nmap, Wireshark, Nessus, Wazuh, Splunk), with a strong foundation in networking fundamentals (TCP/IP, DNS, HTTP/HTTPS, firewall concepts) and OWASP, NIST, and SANS frameworks. Adaptable, collaborative team player with strong analytical and communication skills, experienced in translating technical findings into clear guidance for stakeholders across multiple client engagements. Eager to bring a curious, can-do attitude to cyber defence, application security, and penetration testing in a fast-evolving threat landscape.

WORK EXPERIENCE

Cryptus Cyber Security Pvt. Ltd. — Delhi, India

Cyber Security Analyst – SOC & VAPT | November 2025 – Present

- **VAPT Across Web, API & Network:** Conducted hands-on VAPT across Web, API, and Network environments on **5+ client engagements**; identified and validated vulnerabilities including SQL Injection, XSS, IDOR, CSRF, and authentication flaws using Burp Suite, SQLMap, and Metasploit following OWASP Top 10 methodology.
- **Security Assessments & Hardening:** Performed network and mobile application security assessments using Nmap, Wireshark, and Nessus across Linux and Windows environments; identified misconfigurations, open ports, and weak authentication mechanisms, delivering hardening recommendations aligned to NIST and SANS standards.
- **CVSS Reporting & PoC Documentation:** Produced structured penetration testing reports for client engagements with CVSS-based severity ratings, proof-of-concept (PoC) documentation, and remediation steps, translating technical findings into actionable guidance for technical and non-technical stakeholders.
- **Security Auditing:** Assisted in scoping and executing company-level security audits for client engagements, coordinating cross-functionally to assess and document security posture per NIST and industry-standard frameworks.

KEY PROJECTS

Browser Pentest Assistant — Python, FastAPI, PySide6, Chrome Extension (Manifest V3), SQLite |

github.com/shubham93-ops/BrowserPentestAssistant

- Built a full-stack web application security testing tool combining a Manifest V3 browser extension, FastAPI backend, and PySide6 desktop interface for real-time HTTP/HTTPS traffic interception, inspection, and security testing workflows.
- Developed testing modules for OWASP Top 10 vulnerability inspection (SQL Injection, XSS, IDOR, Clickjacking), header analysis (HSTS, CSP), and session/token validation.

GhostTrace — Android Security & Diagnostics (In Progress) — Python, PySide6, ADB, SQLite | github.com/shubham93-ops/GhostTrace

- Developing a modular Windows desktop application for Android device management, diagnostics, ADB-based device discovery, wireless debugging, and security auditing (AOSP architecture).
- Built with modular architecture, thread-safe state handling, and secure authentication incorporating PBKDF2-HMAC-SHA256 password hashing. QR-based pairing and screen-mirroring are currently in active refinement.

Web, API & Network Penetration Testing Lab — Burp Suite, Nmap, SQLMap, Wireshark, Metasploit, Juice Shop, DVWA

- Built a controlled offensive security lab using DVWA & OWASP Juice Shop for hands-on Web and API penetration testing; systematically tested SQLi, XSS, CSRF, IDOR, and API flaws using Burp Suite and Metasploit; documented PoC and remediation steps.
- Performed network reconnaissance and traffic analysis using Nmap and Wireshark on simulated network targets; validated 15+ vulnerabilities and misconfigurations, authoring structured remediation recommendations.

EDUCATION

Compucom Institute of Information Technology — Jaipur, Rajasthan

Bachelor of Computer Applications (BCA) | 2022 – 2025

CERTIFICATIONS & TRAINING

- **Honeywell Cybersecurity Training** – Certificate of Recognition, **Grade A** | Honeywell & ICT Academy (with Palo Alto Networks) | Nov 2023
- **Cryptus Certified Ethical Hacker (CCEH)** – Cryptus Cyber Security Pvt. Ltd.
- **Web Application Penetration Tester (WAPT)** – Cryptus Cyber Security Pvt. Ltd.
- **Cryptus Certified Network Administrator (CCNA)** – Cryptus Cyber Security Pvt. Ltd.
- **Vulnerability Assessment & Penetration Testing (VAPT)** – Cryptus Cyber Security Pvt. Ltd.
- **Cryptus Certified API Testing** – Cryptus Cyber Security Pvt. Ltd.
- **Cryptus Certified Forensics Investigator (CCFI)** – Cryptus Cyber Security Pvt. Ltd.

TECHNICAL SKILLS

- **Penetration Testing Tools:** Burp Suite, Nmap, SQLMap, Metasploit, Wireshark, Gobuster, Dirsearch, Nuclei, Amass, Postman, Kali Linux
- **Security Domains:** Web Application Security, VAPT, API Security, Network Security, Mobile Security, OWASP Top 10, Security Auditing
- **Vulnerability Testing:** SQL Injection, XSS, IDOR, CSRF, Authentication & Authorization Testing, Business Logic Flaws, Security Misconfigurations
- **SIEM & Monitoring:** Splunk, Wazuh, Nessus, OpenVAS, Log Analysis, Incident Triage
- **Programming & Scripting:** Python, Linux, Bash, FastAPI, SQLite, Git & GitHub, Networking (TCP/IP, DNS, HTTP/HTTPS)
- **Assessment Frameworks:** CVSS Scoring, PoC Documentation, Vulnerability Reporting, Security Hardening, NIST Guidelines, SANS Controls
